Dear sir,

AN APPLICATION FOR THE POST AS WEB DEVELOPER/ADMINISTRATOR

I am writing to apply for the Systems Developer position at Mzuzu University, as advertised. Am a Malawian man aged 23, I finished my bachelor's degree on 30th April, 2024 and I have a pending Bachelor's degree in Business Information Technology to be obtained from the Malawi University of Science and Technology this year, with a strong background in programming, database management, and software development.

My experience includes working as a Software Engineer at my university, where I developed and maintained applications and systems. Additionally, during my internship at Malawi Research and Education Networks (MAREN), I assisted in setting up and maintaining network infrastructure where I also worked as a systems developer.

I have successfully worked on projects such as the Illovo Stakeholder Engagement System using Flutter and Firebase, and a CRM system for MAREN using Vue.js and Laravel. These experiences have equipped me with the technical skills and problem-solving abilities necessary for the Systems Developer role.

I am excited about the opportunity to contribute to your team. Thank you for considering my application. I look forward to discussing how my background and skills can benefit Mzuzu University.

Sincerely,

Thapson Nyirenda
